

Safety Academy Modules

MODULE 1

First Aid (Basic to Advanced Levels)

The module will cover a full range of basic and advanced first aid procedures. The training will include first aid principles and emergency response procedures, anatomical terminology, the structure and functions of the cardiovascular system, bleeding control and shock management, treatment of different types and degrees of burns, and first aid response to fractures, dislocations, and sprains. The module will also cover cardiopulmonary resuscitation (CPR).

The training will place a strong emphasis on hands-on practice, allowing participants to apply and practice the first aid procedures covered during the module.

Date: 05.11.2026 | Cost: 2 000 000 UZS | Duration: 16 hours

MODULE 2

Air Products Safety Academy Overview & Basic Occupational Health and Safety (OHS) Training

The module will introduce participants to the mission, objectives, and training structure of the Air Products Safety Academy. It will cover the program's role in supporting the development of a workplace safety culture in Uzbekistan, as well as the certification process and requirements for participants upon completion of the training.

The module will also cover the fundamentals of occupational health and safety as a structured management system. Key topics will include the responsibilities of employers and employees, major categories of workplace hazards – mechanical, physical, chemical, biological, environmental, and organizational – as well as the processes for identifying, assessing, and managing workplace risks. Particular attention will be given to the development of a safety culture and employees' right to stop unsafe work.

Date: 12.11.2026 | Cost: 1 400 000 UZS | Duration: 8 hours

MODULE 3

OSHA Principles (Locally Adapted Content)

The module will introduce participants to U.S. occupational safety and health regulations and their practical application in the workplace. It will cover employers' responsibilities for providing safe working conditions, workers' rights, occupational injury recordkeeping requirements, hazard communication requirements related to chemicals, and the appropriate use of personal protective equipment (PPE). Additional sections will address workplace inspection procedures and key occupational risks, including working at height, electrical safety, and fire safety.

Date: 19.11.2026 | Cost: 700 000 UZS | Duration: 4 hours

MODULE 4

Safe Behavior Training

The module will focus on behavioral factors affecting workplace safety and will address why knowledge of safety rules alone may not be sufficient to prevent incidents. It will cover the development of unsafe habits and the effects of time pressure, fatigue, and overconfidence on employee behavior and decision-making. The module will also address the role of the working environment and personal responsibility in supporting safe workplace decisions.

Date: 03.12.2026 | Cost: 700 000 UZS | Duration: 4 hours

MODULE 5

Basic Safety Rules for Building & Infrastructure Construction

The module will cover safety management at construction and infrastructure sites, including hazard identification, risk assessment, and the application of appropriate control measures, ranging from eliminating hazards to using personal protective equipment. It will address job safety analysis and permit-to-work procedures, as well as major construction-related risks, including working at height, electrical hazards, lifting operations, and exposure to dust, noise, and vibration.

The module will also cover relevant requirements of the Republic of Uzbekistan's legislation, emergency response and evacuation procedures, and the process for investigating workplace incidents. Practical cases will be incorporated into the module to support the application of the covered safety principles to workplace situations.

Date: 10.12.2026 | Cost: 700 000 UZS | Duration: 4 hours

MODULE 6

EHS Awareness (Environment, Health, Safety & Wellbeing)

The module will cover three interconnected areas: environmental management, occupational health, and employee wellbeing. The environmental component will address the assessment of industrial impacts on the environment in accordance with international standards, as well as waste management practices, including waste classification, storage, disposal, and reduction.

Date: 17.12.2026 | Cost: 700 000 UZS | Duration: 4 hours

MODULE 7

Basic Firefighting & Breathing Apparatus Use

The module will cover both theoretical principles and practical skills related to fire safety. Key topics will include common causes of fires, fire classifications and corresponding extinguishing methods, as well as the types and appropriate use of fire extinguishers.

Additional sections will cover relevant fire safety requirements under the legislation of the Republic of Uzbekistan, fire alarm and automatic fire suppression systems, evacuation plans, and procedures for personnel response in the event of a fire. The module will also address the use of respiratory protective equipment.

Date: 21.01.2027 | Cost: 700 000 UZS | Duration: 4 hours

MODULE 8

Incident Investigation: Reporting & Mitigation

The module will cover the full workplace incident investigation cycle, including immediate actions at the incident site, information gathering, analysis of incident causes, and the development of measures to prevent recurrence. It will address occupational accident recording requirements in accordance with the legislation of the Republic of Uzbekistan and examine the distinction between immediate and systemic causes of workplace incidents.

The module will also cover key root cause analysis methods used in international practice. A separate section will address the legal principles related to compensation for harm caused to employees as a result of workplace incidents. Practical exercises will be incorporated into the module to support the application of incident investigation and analysis methods.

Date: 28.01.2027 | Cost: 700 000 UZS | Duration: 4 hours

MODULE 9

Defensive Driving

The module will cover defensive driving principles and practices aimed at preventing road traffic incidents. Key topics will include effective road observation, maintaining a safe following distance, selecting an appropriate speed based on road and visibility conditions, and managing blind spots. Particular attention will be given to risks associated with night driving, recognizing driver fatigue, and using mobile phones while driving.

Date: 04.02.2027 | Cost: Price upon request | Duration: 4 hours
